

ENVIRONMENTAL PURCHASING POLICY

Our procurement policy is oriented towards local, environmentally friendly, fair trade and efficient purchasing.

Our business aims to work with sustainable suppliers that have Quality Assurance Management Systems, Environmental and Occupational Health and Safety Management Systems and sustainability labels/certifications, as well as environmental policies and practices to meet our raw material and service needs.

Purchasing of consumables and disposable goods, including food, is carefully managed to minimize waste. Preference is given to goods that can be reused, returned and recycled.

When sourcing products, preference is given to environmentally certified products and suppliers.

Threatened and endangered species are not used.

When purchasing goods and services, our business prioritizes local/regional suppliers that are available and of sufficient quality.

We try to create efficient purchasing opportunities together with our suppliers and aim to reduce the environmental impacts arising from procurement processes.
